DaveGMMSorry, no way, uh-uh are you allowing the Tint and Scope remover skin to be allowed.

It gives people who have it a great, GREAT advantage over the people who don't. They can see snipers the whole screen away, other's can't.

I will personally ban anyone on Crimson79 that admits they use it.

I never use the scope

But I have added a nice GDI/Nod logo to the black part of the skin, thats just look a bit better
