i have that now i get those new errors

robbyke wrote on Wed, 11 May 2011 22:50 how can i make it so its not static because now it gives this

```
.\KB_Functions.cpp(716) : error C2352: 'SettingsLoader::LoadSString' : illegal call of non-static member function
```

```
    c:\documents and settings\robby\bureaublad\source\gmsettingsclass.h(23) : see declaration of 'SettingsLoader::LoadSString'
```

plus eleven more compiler errors caused by this one
