Just rename scripts.dll to scripts3.dll and rename scripts2.dll to scripts.dll. When you have finished playing single player, you can rename the files back.

I've heard people say that but just assumed it was a few minor unimportant bugs. never realized they could be game crippling but thanks

TBH I don't know why people have issues with 3.4.4 in SP.

I played it on 2 maybe even 3 different systems with 3.4.4 and never had a single issue 0o
