Homey wrote on Wed, 08 June 2011 13:54 I've had no such luck getting it to work, doubtful that it ever will. Even if TT releases with widescreen support, unsure whether it'll support a bigger FOV than typical 16:9.

TBH what I do is play windowed mode or do 800x600 in single screen. My monitors have a 4:3 button that makes it look decent.

Well, actually TT adjusts itself to the screen, although i'm not sure what it does with the FOV.
