Subject: Renegade will not run past "Autorun" screen(Resolved)

I'm running Renegade from the package deal of C&C games. If I am correct, that is called "The First Decade".

Anyways, I had the game installed on my computer a few years back but for whatever reason it was uninstalled. I found both disc and re-installed it. Everything went great, and I got up to the screen with:

"Play"
"Uninstall"
"Go To Website"
etc.

I hit play and the little preview screen before the game actually loads pops up that just says:

COMMAND & CONQUER:
RENEGADE

After that disappears an error message pops up and I cannot play the game. I have tried running it as an administrator, and I have looked for the "gamex2" file, which I cannot find. Both of these things I did after reading the forum messages a bit, neither worked. I have even, of my own accord, cleaned the disc with some disc cleaner I have, but that did not work either.

I am running Windows Vista. If you need me to, I can post what the error code says. Also, I have sent an email to the support email and have not yet got a reply.

Any help I can get would be great.
