Wiener wrote on Mon, 19 October 2009 05:56I prefer ST over SW but they are both complete different sci-fi genres. However, since lucas turned sw into a kids adventure (target audience 12yo +/-) when releasing episode 1-3 its a clear case

ST >> star wars

Star Wars is not science-fiction. It's considered to be science-fantasy. Star Trek is focused on established and yet-to-be discovered physics, Star Wars is about "the force" and other random mythological forces that make it a fantasy title and not a science-fiction title.

The two are barely comparable. The only thing they have in common is that they are primarily set in space.
