Yo,

Do I take it that the idiots that made the cheats designed them to DELIBERATELY kill Renegade? That is the inference that I get from the title the previous poster gave for the cheaters D/L. Too bad we cannot identify them and ban them from both WOL and Gamespy so all they are left with is single player. Bunch of lame asses!

I periodically hold LAN parties and we get a couple of "awfully good" people coming and I would like to be able to run the anti cheat software on my lanserver so there is no question that ev eryone is playing honestly. (I dont have the bandwidth or wherewithall to run a decent on-line server)

Thanks agasin for all the work on the anti-cheat software!
