I was in the St0rm Mix server and had a 12v12 battle on Fjord. It was quite a bit of fun. It felt very nostalgic - the new Mammoths I built and painted are identical to the C&C95 ones. Rolling through the meadows in these tanks with Orcas and Transports flying overhead was like "Wow, this is what Renegade could have been."

I haven't found any new bugs yet, so I think I'll finish rigging the beta Light Tank and start the VIS process.
