ok so first of all i was running ren on 3.4.4. with both core patches and had a lot of skins along with a custom hud. i install 4.0 and it goes smoothly until i actually launch the game. it loads to a black screen and constantly makes this "ding" sound and ctrl alt del only works for a couple seconds until the black loading screen takes over. im a little confused as to what was happening as there weren't any error messages or alerts or anything. i have vista sp 1 x64 if that makes any difference.

anyways i'm just gonna uninstall ren and i'll apply 4.0 on the clean install. i'll repost after i'm done
