GEORGE ZIMMER wrote on Fri, 09 September 2011 18:51 Wait, what? Flaming APC's? The hell is that?

also, a serious response: too many gameplay mods, moderators are usually dicks, and the gameplay flow just feels closer to something you'd expect activision would churn out.

Define Flaming APC: A flaming apc is a normal apc filled with remote/timed/proxy c4 with the intention of damage upon impact. E.g: To be used against soldiers/tanks.
