Sir PhoenixxEnglandxSeth2k2xhmmmm..... any planetets near by that have oxygen?

Yea Mars..

We'll meet you there

Actually...

Mars' atmosphere contains VERY LITTLE oxygen. Mars' atmosphere is made up of 95% Carbon Dioxide, with only .13% Oxygen. Earth's atmosphere is made up of around 80% Nitrogen and only 20% Oxygen.

Err.. dude it was a joke, notice the "We'll meet you there" part?
