Subject: C&C_Fjord Beta 3

Here's the definitive, non-VIS edition of Fjord. I'll be attempting to get VIS running on it tonight and tomorrow. If it succeeds I'll implement it into the final version.

You will need Scripts 4.0 to run Fjord, so make sure you install it. For those of you who beta tested it privately, go to your Renegade folder in the My Documents folder, open Clients folder, and delete C&C_Fjord.thu before you attempt to play.
