XWIS does the same thing to me. I'd suggest using direct connect programs in place of XWIS.

RenDirCon is a good one that I like to use. Here's some server IPs:

n00bsvr01: 74.53.69.242 Port 6978

St0rm AOW (With new levels): 75.125.197.2 Port 5000
