As lots here know or have seen I am banned in lots of servers .

some of the lies around are that I cheat and the fav lie is sirculated by two haters that I try to chat up a 13 year old girl on facebook so was branded a pedo

lets take a look at some of the main reasons

heres one of the first real bans that started the arguments
  http://www.st0rm.net/forum/showthread.php?13490-banned-by-eye-k-for-his-own-make
-a-reason

as he was a mod at the time his buddys and other mods all join in to abuse in and out of game

http://www.st0rm.net/forum/showthread.php?14661-banned-for

and as I thought it was all totaly unfair being abused in games by mods admins and others and nothing was ever done .

I began to evade bans to play .. ok some ones gona say why evade why not join forums and dispute . well that was not possible as they banned me in forums also .

so I moved to other servers like jelly where for no reason was banned there and later informed that by wilo and eike that they know the mods and admin and asked them to ban me .

so then me and will and others found each other on facebook and hate loads of fun rageing on each other
http://www.facebook.com/profile.php?id=100002440902180

and then as he couldnt win the argument he started reports to facebook that didnt work so he started posting on his wall and mine that . I try to add a 13 year old from his friends list and abuse her ?

but to this day fails to supply any details of this like name time person what was or was not said ect it was just his lie to try make facebook ban me also but he fail.
heres a ss of the things he write in my profile pics
  http://www.facebook.com/photo.php?fbid=106575016100528&set=a.102963996461630
.6024.100002440902180&type=1&theater

so as some other servers have ask why is it you are banned everywhere hope the above reasons show you
banned

jelly --- no reason
atomix --- refused to change my join message

storm --- reason is above
mp ---- host is buddys with wilo

there are others who all did as wilo asked and banned for no reason

edit some more updated links
