danpaul88 wrote on Mon, 03 October 2011 07:18 With 4.0 you can add custom strings tables to a MIX map, I think you have to rename it to something like strings_map.tdb to get it to work. Check with StealthEye, I think he will know how this works since he knows how resource manager works. I'm pretty sure you could force strings to come across in a mix map by putting them in an objects dependencies (in pre 4.0).
