Danteargh... i get home to see that the blacks don't match.... if someone is bored... could you update those, i suck at graphics, im just a programming geek

Belive me I am no graphics jockie , but those any good?

Bored doesn't describe how I feel now .

I have a very dodgey flatscreen monitor and I was sorted slouched when looking at the pics and when you look at my monitor from different angles the levels of black increase/decrease, thus it looked perfect for me and I didn't notice the green.
