I rarely have any issues on TMX as I have a 50 ping. Up to 8 players and its fine, any more and it starts to lag/warp.

I'm banned from DA because sum kid named Gohax thought I was getting too many kills and forced me to use Ren Ressurrection, which is no longer possible with 4.0 installed. Nothing personal dude, just had to put it out there though

I miss the old EKT server I liked being able to use Rav's & PICS's.
