In my brenbot.cfg I set

```
FDSLogFilePath = C:\Westwood\RenegadeFDS\Server 4.0\
```

where "Server 4.0" is the place my FDS is located, are you referring to that setting? It's the only thing I had to do to get BRenBot working.

The place that the actual log files are located for me is C:\Westwood\RenegadeFDS\Server 4.0\Renegade\FDS .
