That's your personal opinion

have a degree in something does not say that you are educated, knowledge and education is not the same. how many people profecionales there? with little education, to which I referred is the way you express your not showing respect. but I'm not going to continue to discuss with you.

Big Mak wrote on Mon, 24 October 2011 22:20lol this is why nobody releases anything here anymore...  
everyone started only releasing @ renskins.

I see, I knew the reputation of this site, about some users without any respect for the work of others. (is checked)

that you can criticize but with respect.
