## Subject: Installation failed
Posted by AngryC4Killer on Fri, 28 Oct 2011 23:26:03 GMT

I have been trying to install 4.0 since last night with no success. I do know that norton's does not like the Cloud.5 portion of it. I turned norton's off and the installer says it has failed to install any suggestions. I am running vista still if that makes a difference. Any help would be great thanks.

EDIT NEVER MIND IT WORKS>
