OK- sorry it took me a long time to respond. I tried the no CD crack cmatt42 suggested, but it didn't work. I believe I did it correctly, it just didn't work, so I reinstalled Renegade and played it using RR and the Data CD. A few minutes ago, I downloaded and installed the first link on this http://www.tiberiantechnologies.org/downloads page. It does not work. After I click he R that says Tiberian Technologies in the upper left, it insists I must have the CD and gives me two options: insert Data disk or cancel. I then tried to connect with RR, and it gave me an error message which I have attached here.

I installed MIRC, but I have only used IRC once before, a long time ago. I enter my nickname and alternate, but then I don't know what to do.
