I was kinda wondering about the whole ordeal when it comes to creating an account for Renegade. As it is right now you have to go through the XWIS control panel. This leads to a problem; if someone, lets say, goes and buys the game at a discount outlet (just for the hell of it) and goes home and installs it but then can't create an account, said person would probably toss it thinking its a dead game.

So I'm wondering is there a possibility that the TT people are working on any sort of solution with XWIS to fix this?

I see that XWIS has seemingly been fixing a bunch of stuff that was killed off. Just wondering if this may be on the "To Do List"?
