If you lost your serial(s), I'm really sorry but there is nothing we can do.

Damn an that is my Problem for my Nickname "Minibar" in Renegade.

I got the Nickname "Minibar2" and "Minibar3" with my other Serials unlocked on XWIS (I have 3 Renegade Cds + Serials).

The problem with the username "Minibar" in Renegades WOL is, that my Password ist to weak for entering WOL.

Any chance to get me a safer password or that you can reset it on manual without my serial Key? I have enough ways to approve that the Nickname "Minibar" really belongs to me.

If you or the strike-team have a way to help me (or not), please let me know.

You can write it here in this topic or under this link:

Thanks for your help...

Greetings from Germany

Minibar

.  
. .  
.

I added the picture from the Mail you can see below...

Here you find an old E-Mail that I made to Crimson on Sunday, 30 January 2011:

Good Morning Crimson,

Good Morning BH-Team,

can you please activate my account @ renegadeforums.com named "Minibar"?

I want to write Topics and use your forums.

"The administrator had chosen to review all accounts manually prior to activation. Until your account has been validated by the administrator you will not be able to utilize the full capabilities of your account. "

Can you help me out with another Problem?

I added my Renegade Serial to the XWIS - Control Panel.  
Then my Nicks got added "Minibar2" and "Minibar3".  
I wondered where my Nick "Minibar" is...

Just one answer... on another Serial Code!

In 2003 I bought Renegade three times, for me, my brother and my best friend.

I think the serial code for my Nick Minibar is lost.

Can "you" find out where the Name Minibar is listed, and send me the Serial Code from Minibar?

Or can you reset the password from the Nick Minibar in XWIS (WOL) from Renegade and send me a new password for it?

I know the existing password, but the password is too weak for using the Nick on XWIS Renegade

I added a picture, that you see I am not lying and the Nick Minibar really belongs to me.

For Questions about my Name and anything else, you can ask Apoc, Lou Castle, the German C&C Community Manager "Gambler" from cnc-inside.de aka figh7club or just watch into the mails from Aaron where he said goodbye and look into the CC [deleted].

If there are some questions. Ask me.

I want to activate my "real" Nick Minibar again with a new save password on XWIS. Cause All my friends are added in this buddy list and all know me under this nick in Renegade.

All my Stats are on this Nick.
