I am in close contact with most of the people who run servers for Renegade. I am not aware of any software or solution as effective as RenGuard. Most server owners plan to use RenGuard, so anyone else who wants to make a software product will be a month behind in development and light years behind in PR.

You can reach me in the n00bstories IRC channel --

irc.n00bstories.com #n00bstories

Or visit http://www.n00bstories.com/irc.php for connection information and a handy java applet if you don't have an IRC client.
