liquidv2 wrote on Wed, 01 February 2012 22:26we determined the cause after testing it extensively with NACHO ingame  
it appears to be a combination of his models and skins that set BIATCH off

Quote:We conducted very detailed ingame testing just now. The trigger mechanism was hitting timed C4 (on enemy's back or in hand) with NOD shotgunner. Nacho finally removed his C4 skin and it is ok.

I tested that C4 model on myself too and it did nothing so I think that the cause is this model interacting with some other model Nacho uses. Case is closed.

not sure what the true cause was but either way it's not happening anymore  
I'm not buying it. Not until it can be reproduced or he comes up with a proper explanation. As I already said, it's IMPOSSIBLE to do 28 damage.

But that doesn't matter I guess, it's your server...
