what are the default settings?

if your using appdata for the servers you would want to give each a different name. Not that you would want to.

I just assumed the defaults not actually using paths.ini.

[paths]

RegBase=BlueHell

RegClient=APBSetup

RegFDS=Gamma

FileBase=BlueHell

FileClient=APBClient

FileFDS=APBFDS

UseRenFolder=no

[paths]

RegBase=Renegade

RegClient=Client

RegFDS=FDS

FileBase=Renegade

FileClient=Client

FileFDS=FDS

UseRenFolder=yes
