Subject: Renegade Failed to Start
Posted by Gohax on Sat, 25 Feb 2012 05:36:32 GMT

EDIT::

I restarted computer and installed beta 3 this time. Now, it goes like it's going to start Renegade, but then crashes. Crashdump attached.

Toggle SpoilerAs the title says, I get a box with a red circle X in it saying "Renegade failed to start."

My process of installing Renegade:

Install with TFD.
Install 4.0.
Update via UAC Launcher.

I've tried installing Beta 3, and I got the same error. I did Beta 1 then Beta 2 and still the same thing.
