not that it matters much now but to a lot of people on st0rm it looked like Nune was testing ARR-G-H out for a while

i saw some fraps people had gathered and it made me say Hmmmm.

does that mean he's not a good player, even if it's true? nope; he's still a good player regardless he can play at a high level even with 4.0

lots of people jumped on the TiDeTh sucks because he cheats bandwagon, and to be fair he was good with vehicles and always at least a decent sniper

the only thing he cheated to get better with was really his pistoling (and sniping as well)
