This map will have 4 Helipads for each team on the main islands (where the tibfield is). There will be one Tib Silo for each team giving 7\$/sec inside the Tiberium Fields. Then on the elevated part of the island (where the two little big rocks are) there will be repair pads to repair your choppahs.

The aircraft carrier in the center of the map can be 'captured' and its deck can then be used to refill your heli's with new ammo.

I might or might not add man-able cannons on the deck, or anti aircraft stuff...

Hmm
