i got the little 4.0 beta 4 hot fix and played

i clicked to fire and heard a "Donk" Windows 7 noise that happens when you click outside of a box or something

the game had closed and my mouse had gone through and clicked on the desktop

i re-opened ren and rejoined and it pmsg'd me saying CD Authentication Error - Please Quit

i had gameplay pending and it kicked me out

now every time i try joining it does the same, and it's happening to more and more people in the same way

not sure what's wrong, but please help
