Sounds much better than what I remember you posting like last year. Your use of timing has gotten much better.

It sounds consistant but you're no deadmau5 yet, But deffo have improved a lot. Try and use better sounds and stuff.. and more bass wouldn't hurt, the part after the intro and before the end-ish, if I heard that in a club I think I'd dance to it.

keep practising, edm 'n music making program isn't easy to learn, but you've progressed, keep it up man!
