Most people probably don't know this but, i was just wondering where Renegade Realms servers were hosted. Obviously they allow php Nuke as that is what Ren Realm was based under, as is my soon to be site.

Also, if anyone has any suggestions for Hosts that allow PHP-Nuke (and accept Direct CC #'s, not Paypal or crap like that) and are Reasonably priced (Under \$150 U.S. a year) please post them.

Thanks,
