I found something.

Today i have been playing alot and the server "crashed" a few times.

However it wasnt a crash if a player "left" the server would stop responding.

I was lucky when late at nigh the person who "left" was one of those that i could talk with.

he told me that he had gotten an error and crashed to the desktop i have his crashdump here.

to summarise a bit:

my server doesnt crash it hangs when a client crashes kicking all players
