iRANian wrote on Sat, 23 June 2012 10:10 What is it needed for? If you're releasing a binary people can just copy and paste the ASM for the encryption and decryption functions or hook them and have the output for them get logged to a console window.

It would be in a released binary, yes.

I am storing a user name and password to a settings file, and storing it as plain text isn't acceptable.

danpaul88 wrote on Sat, 23 June 2012 11:09 XOR encryption is simple but effective. Google it

Thank you.
