ballstein wrote on Sat, 23 June 2012 06:07So, I had an installation fail trying to install 4.0 Beta 5(? this is topic for 4 but when I went to new installer page it said 5).

To give you a little info first off....I'm running a pre-ren made computer (my laptop died a few weeks ago and haven't gotten a new one yet) running a version of Windows ME skinned to look like XP and not updated since early 2002. I'm pretty sure my issue is due to my computer being old and a POS.

That being said, after it failed this is the only msg I got.

You're running windows ME? Seriously? I'm pretty sure the TT-patch requires win XP at least.
