Ok, not to be a whiny, begging-for-features, post-bumping ass. But is there any chances that there will be any sort of working text import for presets? Even without all those fancy features I hoped for?

I am working on a mod: <https://www.bluehellproductions.com/forum/index.php?showtopic=25411> that is mainly rigging, so the availability of text import greatly affects my workflow.
