Animoskity wrote on Fri, 13 July 2012 21:13How do I make it so the plugin for BRenBot that was released with this plugin works with Xpert's updated version?

I wouldn't call it "updated" since all I did was change the prefix so that it works with my bot. I would just not use the plugin for the time being if you really want to rely on it. There's still false positives with this plugin.
