saberhawk wrote on Fri, 27 July 2012 23:55: Until very recently I've been using an EVGA 012-P3-1572-AR (same chip, less RAM and factory overclocked by 100mhz) without any problems. I upgraded to a GTX 670 for "various" reasons.

Toggle Spoiler  
You can do that?

Triple head with Renegade? Man, that's the shit
