From what I have seen Iran found a bug with the ladder, reported it (in a somewhat comical way) and thats it.

You cheated for years, created beacon emitters which are not skins, they are blatant cheats.

I'm not saying once a cheat always a cheat, seen a lot of immature idiots in Ren become decent players over the years (myself included). But the situations are hardly comparable.

Are you fucking blind, he is making exploits around 4.0. and then goes in game and uses them and crashes servers, not to mention giving it to all his friends to do the same, yeah thats reporting it alright, this yeah he fucking reported it by doing this umm thats sure reporting it.   I never used cheats and you saying I used cheats for years is very false.

Cheat: R G H (Never touched)
Model/Emitter: w3d (My beacon emitters)

Cheat is a program used by someone to give them a huge advantage of killing someone ingame, which *cheat name removed*those.

My emitters are not programs they are just that emitters/w3d files, they are only advantage wise because you can see them from a long distance away.

Edit: If me or shit even Shaitan were "Reporting" exploits like this you would all jump on the ban them band-wagon.
