Installed Windows 8 today, its "usable", but annoying to use.
I disagree. It works fine, just slightly different than you're used to.

My major fault is the start menu/window, the Window itself is fine, however I'm not particularly happy with the limited customisation available in terms of its look and feel.

What annoys me is its position, if you are inside another application, you have to go all the way to the top right, then down to the center of the screen, sure you can press the windows key on the keyboard but some people rather the ability to navigate through their entire OS with a mouse.

Also is Aero still available or is it removed?
