My parents own a company and would be required to pay for insurance for all their employees, taxes would be raised astoundingly, and every person in the USA would be required to pay for health insurance.

Two things

Firstly I'm a little puzzled; your parents, as company bosses, would now have to pay for health insurance for all the staff, AND taxes would go up a lot? can you please explain to me, as a non-American, why that would be the case?

secondly, is that something you've heard your parents complain about, having to sort out health insurance for their staff? If I heard my father complain about that, my response would probably be to ask him why he hasn't done that already.
