The buttons to register don't work anymore and haven't worked for a long time.
Check out this sticky for the current process:

(2 hours of gameplay on an old XP laptop later:) My serial is definitely OK

I knew about the broken register button, but not about the online process. Logging in with an unused nick on WOL seems to still work anyhow.

Thanks Omar

I'm going to see if I can compare the IP traffic out of my Wine Renegade and XP Renegade, looking for differences.

To TT devs: could my client blank my advanced game listings because it thinks some resources are wrong/I'm trying to cheat?
