Subject: Help With DirectX

Recently, I got a new computer, and felt like playing Ren on it with all the graphics maxed out. The only trouble is that whenever I start the game, it says "You need to update your version of DirectX in order to use this copy of scripts.dll." I have 11, so is Ren so old it isn't compatible with the newest version, or is it an issue on my end? Assistance would be appreciated.

Edit: Fixed. Just had to reinstall scripts.
