I have a similar case to Iran, play BF3 ultra high 70-90 fps np.

Plays fjords, depending on where I'm looking at 20-310fps, I can't imagine what would happen to my FPS if a mass were to be going on.

Lots of people who play ren, play it because its all their PC will handle lol, mrhero101 for example gets 13 fps on that map making it unplayable
