Around 2 weeks ago a Player joined Jelly and started talking in Open Chat to Xpert and revealed himself as Tunaman, spamming the Chat with all kind of stuff. On the same Day, the same Player joined MPF Servers and started talking shit in PMS to me and other Players, after he was muted then he disappeared saying he just wanted to join servers to troll. Some researches brought up the Name Tunaman, therefore the chances are very high that this is/was you.

What the fuck? I don't remember this. I think I would remember talking to Tunaman. What is this... I don't even...
