Subject: Re: Displaying the Directory of Blocked files
Posted by StealthEye on Mon, 01 Apr 2013 13:08:37 GMT

I believe the message is sent from the server, and the server does not know where the client loaded the file from, so this information cannot be added easily.

I do however want to fix the bug with incorrect messages appearing when switching between servers. So far I have not been able to reproduce the issue, so if anyone has any reproduction steps, it would be appreciated.
