---

Is anyone available with the Windows 8 64 Bit Operating System installed?

Preferably you have IRC so we are able to chat directly with each other

I need to test an installation file which will install a few images in a folder of your choice.

You can very easily remove them after testing, the images are just some wallpapers from TCW.

I need to make sure that the installation program i'm creating is compatible with Windows 8 64 Bit, something which the current installer for TCW 1.52 lacks.

Please PM me on [irc.multiplayerforums.com](http://irc.multiplayerforums.com) if you have Windows 8 64 Bit and want to help me with this

Thanks.

Greetz zunnie
