Sir PhoenixxNHJ BV And it is basically unsure what happened to Kane at the end of TD, as the Kane in Tiberian Sun could as well be a clone

And everything that happened in TD and TS could have been a test program in the Matrix...

But it isn't. There was nothing said in either TD or TS about Kane being cloned, rumors, speculations, and 'addon' stories made up by other players don't count at all.

But don't forget that the Firestorm ending strongly hints at Kane being cloned. And after all, he does live at least some 150 years (Red Alert ends in say 1955 at latest, Tiberian Sun ends in the 2030's. Kane didn't age a day.)
