Quote:No, because we suspect severely that you are using cheats.

The thing is; you are either just extremely good or you are using something, and we can't prove anything but you can also not prove you don't.

So to safeguard the players on the server i suppose a ban is nessecary.

There is nothing left to say here, i am sorry if you REALLY don't cheat.

DJ says he's banned for triggerbot - from the looks of it, zunnie has no idea what cheat Iran's using (if he's actually using one)

not sure why DJ would be upset at other people cheating; he's been seen using cheats (in a community war, nonetheless) and caught glitch abusing on multiple servers (even has fraps of himself doing it), so i don't quite understand
on top of that, he's still not any good at the game

enjoy your Iran-free server
