Now imagine that with the game I got banned on at the score screen; 4.0, almost no lag, about 32 players ingame, I'm whoring 4 shot Ramjets/Volt Rifles/LCGs, camp one spot and 93% of the players I'm up against are substantially worse than chad1233 (the player 'glors' was the other 7% or so).

Then it's not amazing I get double the amount of kills the next best person did, kinda like I regularly do on Jelly when I use a sniper, playing substantially 'better' players (mostly because they sit behind a wall and refill whenever they take about 50 hp damage..)

Yes, it must have been unbelievable I get twice the amount of kills the second best had.

TOO EXTREMELY GUDZZZ
